Decent work and economic grow

Lankaran State University (LSU) has made significant strides in aligning its mission with the United Nations' Sustainable Development Goals (SDGs), including Goal 8: Decent Work and Economic Growth. The university focuses on providing quality education and fostering skills that contribute to economic development, particularly through its Faculty of Economics and Management, which offers programs aimed at training future leaders in sustainable and innovative management practices.

Additionally, LSU engages in international cooperation with over 50 foreign universities and is involved in various international projects such as ERASMUS+ and HORIZON 2020. These collaborations enhance students' opportunities to participate in exchange programs, internships, and double diploma projects, which support employability and economic growth.

Furthermore, LSU's infrastructure, which includes experimental fields and a tourism practice center, offers practical training for students in disciplines like Tourism and Hotel Management and Agricultural Engineering, directly contributing to local and regional economic growth.

We will develop fishery in the lakes, which we will create with rainwater. This Pla will help both carbon dioxide, but also to help economic development. In addition, the university has tea fields. Various vegetables planted in Astara and Lankaran in the areas allotted for the university. It helps both experience of students and economic development.

Lankaran State University (LSU) likely promotes decent work and economic growth through various academic programs, research initiatives, and partnerships that align with the United Nations' Sustainable Development Goals (SDGs), particularly SDG 8. This goal emphasizes the promotion of sustained, inclusive, and sustainable economic growth, full and productive employment, and decent work for all.

At LSU, specific areas related to decent work and economic growth may include:

1. Business and Economics Programs: LSU likely offers programs in business, economics, and management that equip students with the skills needed to foster economic growth in the region and beyond. Graduates from these fields can

contribute to the local economy by creating jobs or improving business practices.

2. Research and Innovation: LSU might engage in research that focuses on economic development, labor markets, and improving work conditions. This can help guide policies and practices for sustainable economic growth in the Lankaran region.

3. Entrepreneurship and Start-ups: The University may support entrepreneurship through incubators or courses that encourage innovation and start-up culture, helping students and faculty contribute to job creation and economic expansion.

4. Partnerships and Collaborations: LSU could collaborate with industries, local businesses, and international institutions to foster economic growth and ensure students are prepared for the evolving job market.

By focusing on these areas, LSU can actively contribute to SDG 8, helping promote decent work and economic growth at a local and national level.
