

“Chemistry” Association

The “Chemistry” Association has been organized for students studying in the “Chemistry and Biology Teacher” and “Chemistry Teacher” specialty groups at the Faculty of Natural Sciences. The Association is subordinate to the University SSS. The work of the Association is organized by the “Chemistry and Physics” Department. The main goal of the “Chemistry” Association is to gather students interested in chemistry. The Association plans to hold chemistry evenings and intellectual competitions related to chemistry outside of class. At the same time, one of the main goals of the “Chemistry” Association is to familiarize students with the life activities of prominent chemists during their anniversaries. One of the main issues of the “Chemistry” Association is to provide information about the activities of scientists who have won Nobel Prizes in chemistry, as well as about their research fields.

“Biology” Association

The “Biology” Association has been established for students studying in the specialties of “Chemistry and Biology Teacher”, “Biology Teacher” and “Ecology”. The work of the “Biology” Association is organized by the “Biology and Ecology” department. The main goal of the “Biology” Association is to unite students interested in biology and hold biology evenings and intellectual competitions related to biology. The main goal of the Association is also to hold events aimed at environmental protection.

One of the main goals of the Association is to develop students’ knowledge and skills in biology and to hold discussions on interesting topics related to biology.

Rules for interpreting results after scientific research, preparing and presenting theses and articles

In accordance with the implementation plan established together with the Scientific Department of Lankaran State University, the next seminars of the Student Scientific Society (SSS) on the faculties of the University were held. The seminar was dedicated to the topic "Interpretation of results after scientific research, rules for preparing theses and articles and their presentation". The event was attended by the deans of the faculties, the faculty's teaching staff, the chairmen of the SSS, as well as members of the faculty of the SSS.

The chairmen of the faculty of the SSS presented information about the topic and direction of the seminar to the participants of the event. Then, the dean of the faculty of "Agriculture and Engineering" Assoc. Prof. Balayar Shahbazov, the head of the department of "Veterinary and Zooengineering Sciences" Assoc. Prof. Rahim Bilalov, the teacher of the department of "Foreign Languages and Translation" Assoc. Prof. Yegana Javadova, the teacher of the department of "Economics and Innovative Management", Assoc. Prof. Farid Khankishiyev, the teacher of the department of "Geography and its Teaching Methods" Assoc. Gulnara Mammadova, teacher of the "Biology and Ecology" department, B.M. Shabnam Mirzayeva delivered a report and provided extensive information on the topic, obtaining, analyzing and summarizing scientific results, as well as the rules for compiling, preparing and presenting theses and articles, and at the end of the seminar, answered the questions of interest to the students in detail.

Forms of conducting scientific research in the relevant direction and the process of analyzing the results of research work

In accordance with the implementation plan established together with the Scientific Department of Lankaran State University, the next seminars of the Student Scientific Society on the faculties of the University were held. The seminar was dedicated to the topic "Forms of conducting scientific research in the relevant direction and the process of analyzing the results of research work". In addition to the deans of the faculties, the faculty's teaching staff, chairmen of the Student Scientific Society, and members of the faculty of the SSS also participated in the event.

The chairmen of the faculties of the SSS provided information about the topic and direction of the seminar to the participants of the event. Then, the head of the department of "Technology and Technical sciences" Assoc. Prof. Rashad Aliyev, the head of the department of "Veterinary and zoo-engineering sciences" Assoc. Prof. Rahim Bilalov, the head of the department of "Primary education and preschool education" Assoc. Prof. Ayeddin Aliyev, the teacher of the department of "Financial management and audit" of the Faculty of Economics and Management, B.M. Nuran Huseynli, lecturer of the department of "History and its teaching methodology", assoc. Emin Malikov, as well as lecturer of the department of "Mathematics and Informatics", assoc. Ruslan Hamidov, delivered reports and provided extensive information on the topic, the correct use of literature, as well as the rules for conducting research, methods of analyzing and systematizing the results obtained, and at the end of the seminar, answered the questions of interest to the students in detail.

Rules for compiling a program of scientific research work and conducting the correct selection of literature sources

In accordance with the implementation plan established by the Scientific Department of Lankaran State University, as well as the Department of Science and Research, the next seminars of the Student Scientific Society for the faculties of Philology and Primary Education, Agrarian and Engineering, as well as Economics and Management were held. The seminar was dedicated to the topic “Rules for compiling a program of scientific research work and conducting the correct selection of literature sources”. The event was attended by the deans of the faculties, the faculty's teaching staff, the chairmen of the Student Scientific Society for the university and faculty, as well as members of the SSS for the faculty.

The chairmen of the SSS faculty informed the participants about the direction of activity and the work to be done during the academic year.
