ACTIVITIES ON ENERGY STRATEGY AND ENERGY EFFICIENCY AT LANKARAN STATE UNIVERSITY

A seminar entitled “Azerbaijan’s New Energy Strategy: Digital Transformation and Human Capital” was held at Lankaran State University, dedicated to the legacy of National Leader Heydar Aliyev.

Representatives of SOCAR, university faculty members, and students participated in the seminar. Presentations were delivered on Azerbaijan’s energy policy, strategic projects, digital solutions in the energy sector, and initiatives aimed at developing human capital.

The seminar continued with interactive discussions, and participants’ questions were answered. The documentary film Iz was also screened as part of the event.

A scientific and practical webinar on “Renewable Energy and Digital Technologies” was held at Lankaran State University.

The webinar brought together university faculty members, master’s students, and undergraduate students, who shared their views on the role of renewable energy sources in sustainable development, improving energy efficiency, the potential of solar and wind energy, and the application of digital and smart technologies in the energy sector.

The discussions focused on environmental sustainability, innovative approaches, and the importance of expanding opportunities for future scientific cooperation.

LSU’S CONTRIBUTION TO THE DEVELOPMENT OF A GREEN AND SUSTAINABLE ECONOMY THROUGH THE REFRESH PROJECT

A management meeting with local and international guests was held within the framework of the project “Enhancing Green and Sustainable Economy in Azerbaijani Universities: Renewable Energy and Climate Change Mitigation – REFRESH,” coordinated by Azerbaijan State University of Economics (UNEC), with Lankaran State University (LSU) as a project partner.

A study visit to the University of Barcelona was organised within the framework of the REFRESH project, coordinated by Azerbaijan State University of Economics (UNEC), with Lankaran State University (LSU) as a project partner. Representatives of LSU and other Azerbaijani universities participated in the visit.

During the visit, participants learned about the curriculum, teaching methodologies, assessment system, and student support services of the University of Barcelona's master's programme in renewable and sustainable energy. They also received information about the specialisation programme in circular economy and sustainability.

As part of the visit, a seminar was held on the role of university–industry relations in developing innovation ecosystems.
