SEMINAR ON SUSTAINABLE WATER RESOURCE MANAGEMENT AT LSU

Lankaran State University (LSU) held an environmental awareness seminar on sustainable water resource management.

The seminar addressed the impact of climate change on water security, Azerbaijan’s water resources, ways to prevent water scarcity, and the efficient use of water. The participants also discussed how international practices could be applied to local conditions.

Hidrosferin tərkibi:
Hidrosfer
Atmosfer suları
Dünya okeanı
Quru suları
Buzlaqlar
Göllər
Çaylar
Laylararası sular
Yeraltı sular
Qrunt suları
Okean
Dəniz
Körfəz
Boğaz
Hidrosferdəki suyun ümumi ehtiyatı 1,5-2 mlrd. km3-dir. Bunun 94%-ə qədərini Dünya okeanında olan şor sular, 4,12%-ni yeraltı sular, 1,65 %-ni buzlaqlar və daimi qar örtüyünün suları, qalanını isə göllər (0,16%), torpaq rütubəti (0,005%), atmosferdəki sular (0,001%) və çaylar (0,0001%) və s. təşkil edir.

Analysis of Student Survey Results on Biodiversity Conservation at LSU

Lankaran State University (LSU) organised a roundtable discussion on the results of a student survey on biodiversity conservation.

The discussion addressed students' environmental awareness, environmental protection, climate change, and biodiversity conservation. Participants put forward suggestions to strengthen environmental awareness, engage students in practical activities, and support volunteering initiatives.

National Conference on Environmental Protection and Green Development Held at LSU

Lankaran State University (LSU) hosted a national scientific and practical conference entitled “A Green World: Solidarity and Development for the Environment.”

The conference addressed green economy, environmental protection, sustainable development, and green nanotechnology. Representatives of higher education institutions from Azerbaijan and Türkiye participated in the event. The conference continued in several thematic sections, where nearly 200 research abstracts were presented.
