Research independence

University academic staff are essential to research, and providing them with effective support is vital for creating an environment that promotes innovation and the advancement of knowledge. Support for academic staff in their research can come in various forms, including administrative, technical, financial, and developmental assistance. These policies are essential for fostering a scholarly environment that promotes free inquiry, open discussion, and the quest for knowledge.

1. National Framework: The Ministry of Education in Azerbaijan sets overarching policies for higher education institutions, which include general provisions for academic freedom. 2. Academic Freedom: Academic freedom usually allows faculty members to conduct research without interference, express their views, and teach based on academic rigor and evidence. 3. Research Independence: At Lankaran State University, researchers likely have the opportunity to choose their research topics. 4. University-Specific Policies: Our University typically release annual reports, strategic plans, and other materials that outline their dedication to research, teaching, and academic freedom.

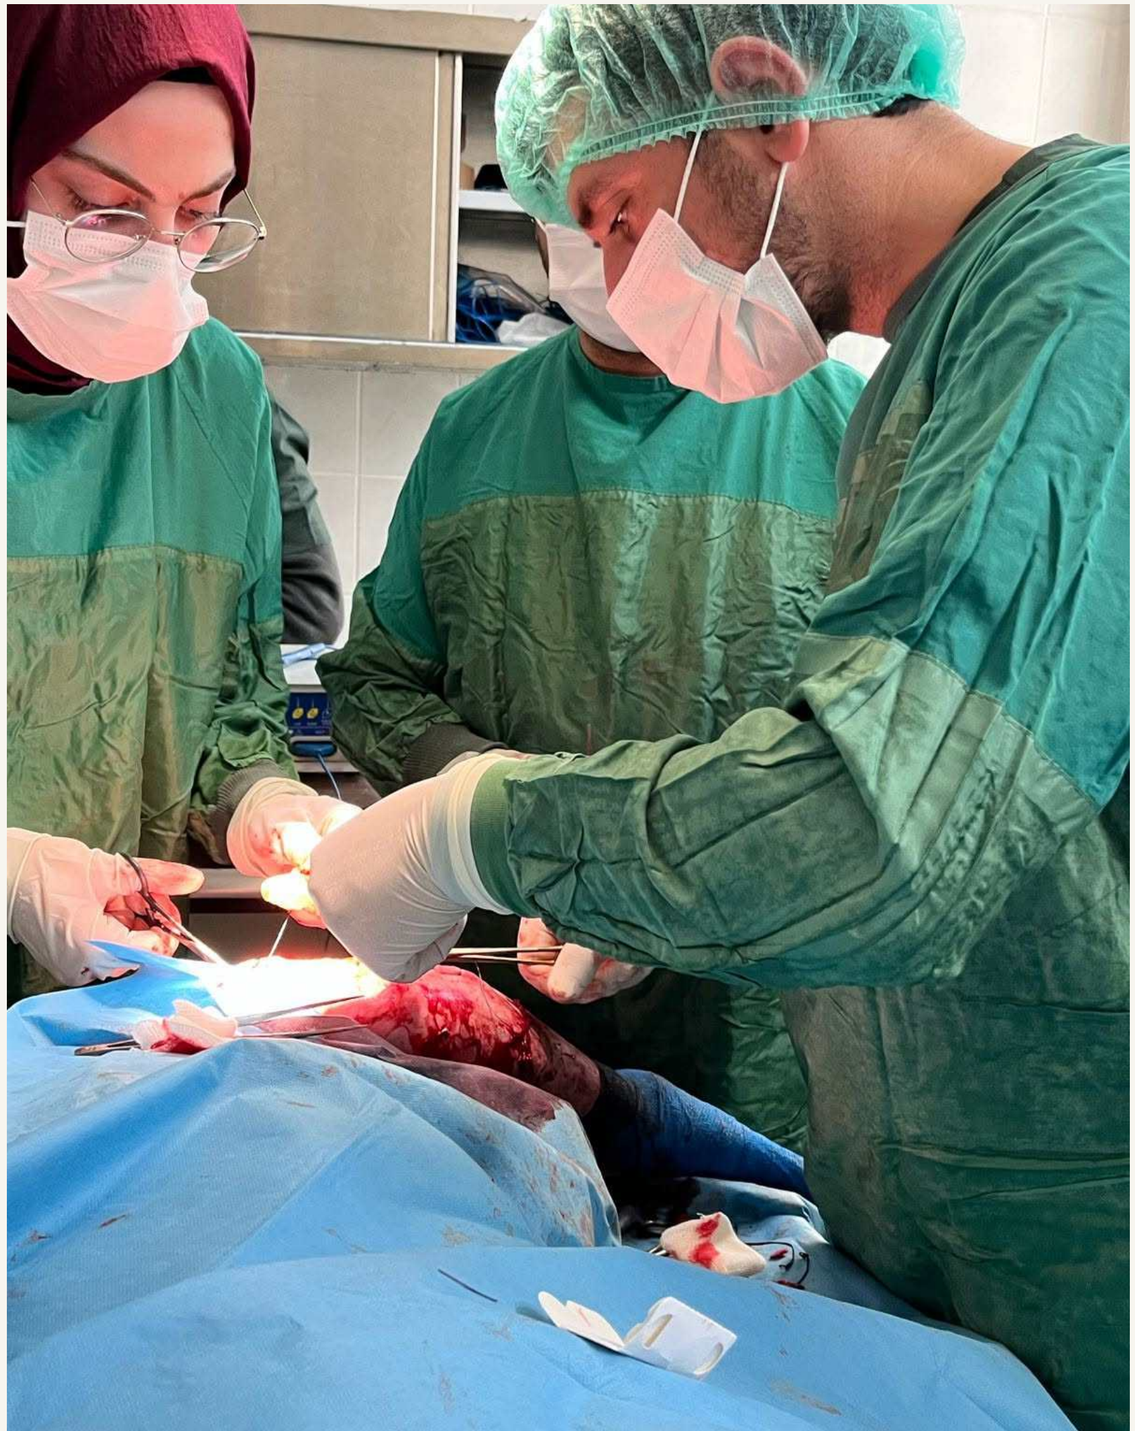

LDU Students Undertake Practical Training in Turkey

Students of Lankaran State University (LSU) are undertaking a three-month practical training programme at Kafkas University in Kars, Turkey.

The students are divided into groups and participate in practical training in four areas: veterinary surgery, artificial insemination, non-infectious internal diseases, and obstetrics and gynaecology.

During the training, students are improving their knowledge and practical skills in laboratory examinations of various diseases, the diagnosis and treatment of non-infectious internal diseases, surgical procedures on animals, artificial insemination, embryo transplantation, and veterinary obstetrics and gynaecology.

HAYVAN HASTANESİ

LSU Master's Student Undertakes Research Training at Kafkas University

Eminaga Akhundov, a second-year master's student at Lankaran State University (LSU), specializing in Obstetrics, Gynaecology and Artificial Insemination, was sent to Kafkas University in Turkey for a four-week research training programme as part of the 2025–2026 academic year, starting on 16 February 2026.

Eminaga Akhundov also participated in the First International Veterinary Radiology Symposium, held at Kafkas University in Kars on 17–18 February 2026.

It is worth noting that students of the Faculty of Veterinary Medicine at Lankaran State University traditionally travel to Kafkas University every year to undertake practical training.

LSU Students Attend Clinical Practice Classes at the Veterinary Research Institute

Since 15 September 2025, fifth-year Veterinary Medicine students at Lankaran State University (LSU) have been attending clinical practice classes at the Veterinary Research Institute under the Ministry of Agriculture of the Republic of Azerbaijan. During the training, students become familiar with the institute's laboratories and departments and strengthen their practical skills in disease diagnosis, clinical examinations, and disease prevention and treatment.

In accordance with the 2025–2026 academic year plan, the 15-week training programme covers animal and fish diseases, veterinary clinical practice, infectious and non-infectious diseases, parasitology, virology, and the production

Representative of Kokand University Visits LSU as Part of the Orhun Exchange Programme

A staff member of Kokand University in Uzbekistan, Davronjon Abdullajonov, visited Lankaran State University (LSU) as part of the Orhun Exchange Programme of the Union of Turkic Universities (TÜRKÜNİB).

During the visit, he met with academic staff and students of the Faculty of Economics and Management, attended classes, and conducted interactive training sessions. Discussions focused on teaching methods, research activities, and academic exchange.

Leadership of the Faculty of Veterinary Medicine at the University of Zagreb Visits LSU

The leadership of the Faculty of Veterinary Medicine at the University of Zagreb, Croatia — Prof. Dr. Marko Samardžija and Prof. Dr. Gordana Gregurić Gračner — held official meetings at Lankaran State University (LSU).

During the visit, discussions focused on expanding international academic cooperation, the activities of the veterinary clinic, and practical training opportunities for students. The guests also visited the university's veterinary clinic and training facilities, as well as LSU's citrus garden.

Representatives of the University of Zagreb Visit LSU

Representatives of the Faculty of Veterinary Medicine at the University of Zagreb, Croatia, Prof. Dr. Marko Samardžija and Prof. Dr. Gordana Gregurić Gračner, visited Lankaran State University (LSU).
During the visit, academic cooperation was discussed, and the guests visited the university's veterinary clinic, training facilities, and citrus garden. The visit concluded with the signing of a cooperation agreement between the two universities.

International Vocational Training Participants Visit LSU

Participants in an international training programme organised under the cooperation protocol between the governments of Azerbaijan and Türkiye in vocational education visited Lankaran State University (LSU).

During the visit, participants learned about the teaching process at the Faculty of Veterinary Medicine, Agriculture and Engineering and visited the university's modern veterinary clinic and agricultural training farm. They were also introduced to LSU's scientific and practical capabilities and available resources.

Professor from Kafkas University Conducts Masterclasses at LSU

Prof. Dr. Cihan Kaçar, Vice Dean of the Faculty of Veterinary Medicine at Kafkas (Kars) University in Türkiye, is conducting masterclasses and practical sessions in veterinary and agricultural sciences at Lankaran State University (LSU). The training covers animal reproductive health, obstetrics and gynaecology, ultrasound examinations, and artificial insemination techniques. These activities help students strengthen their theoretical knowledge through practical experience and improve their professional skills.

Professor Yavuz Ozturkler Conducts Practical Training for LSU Veterinary Students

Professor Yavuz Ozturkler, a renowned academic from the Department of Obstetrics and Artificial Insemination at the Faculty of Veterinary Medicine of Kafkas University in Turkey, conducted another in-person practical session for veterinary students at Lankaran State University (LSU).

The session aimed to help students apply their theoretical knowledge in real working conditions and develop professional skills as part of the international cooperation between the two universities.

During the practical session, which attracted great interest from students, modern methods essential to livestock farming were demonstrated. Prof. Dr. Yavuz Ozturkler emphasised that veterinary medicine is a practice-based field and that practical skills are as important as theoretical knowledge in preparing young professionals to contribute to the development of livestock farming in the region.

Such masterclasses help LSU veterinary students develop the skills needed to become competitive professionals who meet international standards.

World-Renowned Scientist Masud Efendiev Holds Scientific Seminar at LSU

Professor Masud Efendiev, Chairman of the World Association of Azerbaijani Scientists, a renowned Azerbaijani mathematician living in Germany and a professor at the Helmholtz Centre, visited Lankaran State University (LSU).

During his visit, he met with the university's Rector, Professor Natig Ibrahimov, and toured the university's academic buildings and research laboratories.

Professor Efendiev then held a scientific seminar for academic staff and students on the topic "What Should a Modern University Be Like?" The seminar focused on developing creative thinking, scientific integration, the quality of education, and the importance of international cooperation.
