Lankaran State University considers the protection of water resources and the efficient use of water to be important aspects of environmental protection.
The purpose of this Policy is to prevent water waste on the University campus, reduce water consumption, and promote responsible water use among students, academic staff, and other employees.

Key Principles

The following principles guide water conservation at the University:

Efficient and responsible use of water resources;

Prevention of unnecessary water wastage;

Timely identification and repair of water leaks;

Monitoring water consumption and identifying opportunities for water savings;

Raising awareness of water conservation among the University community.

Water Conservation Measures

The following measures are envisaged to promote water conservation on the University campus:
Inspecting taps, pipes, and other water supply equipment;
Identifying water leaks and repairing them as quickly as possible;
Raising awareness of water conservation among students and staff;
Sharing water conservation messages on notice boards and the University's digital communication channels;
Monitoring water consumption and identifying appropriate measures to reduce waste.

Awareness-Raising

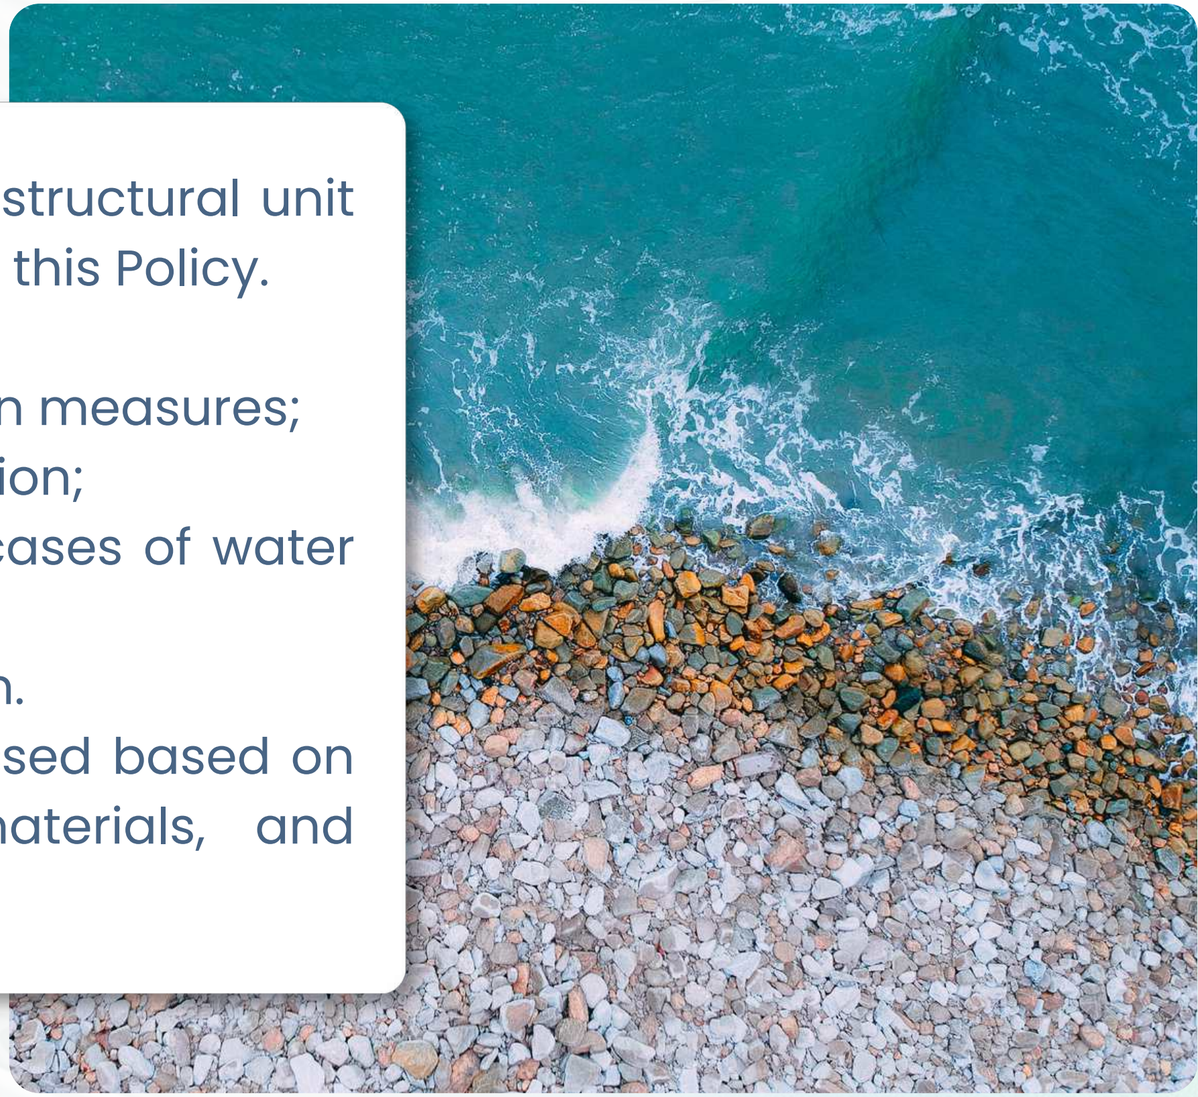

The University aims to inform students and staff about the importance of protecting water resources.

Awareness-raising activities encourage the University community to avoid unnecessary water use, turn off taps after use, and report water leaks to the responsible personnel.

Responsibilities and Monitoring

The University Management shall designate the structural unit responsible for overseeing the implementation of this Policy.
The responsible unit shall:
Monitor the implementation of water conservation measures;
Collect available information on water consumption;
Coordinate action to address water leaks and cases of water waste;
Develop proposals to improve water conservation.
The implementation of this Policy may be assessed based on measures carried out, awareness-raising materials, and available water consumption data.

Final Provisions

The Water Conservation and Efficient Water Use Policy of Lankaran State University aims to protect water resources on campus, reduce water waste, and promote responsible water use.

This Policy shall enter into force upon approval by the University's authorised body and shall be updated when necessary.
