

Built-in accessibility computer systems for visually impaired

Lankaran State University (LSU) determines the creation of an inclusive educational environment as one of its priority goals and takes important steps towards increasing the educational opportunities of students with disabilities. In this context, the university has provided a modern printer specially designed for students with disabilities. The printer is made available to students studying at LSU and serves to ensure their full and equal participation in the educational process.

This technological equipment provides easier access to educational materials for students with disabilities and makes it easier for them to prepare for classes. The printer is equipped with modern technologies and adapted to specific needs, which increases its efficiency.

The university plans to expand its activities in the direction of providing support tools for students with disabilities. This includes the implementation of other modern technological solutions, the use of special software and the creation of various support mechanisms for inclusive education.

In addition, LSU aims to organize various trainings and seminars for students, to educate teaching staff on inclusive education, and to make the physical environment more accessible. The university administration believes that these initiatives contribute to increasing the inclusiveness of society, as well as ensuring equal participation of students in education.
